

Blank Plastic Cards

NewBold Plastics is North America's largest manufacturer of blank PVC cards. Our cards are known worldwide as a superior product, exceeding the rigorous standards of internationally known OEMs of plastic card printers.

✓ Magnetic Stripes ✓ Custom Packaging ✓ Keytags ✓ 21 Color Choices ✓ Signature Panels

Graphics Quality Cards

Our graphics quality cards are manufactured with the highest quality materials that provide an exceptional surface for your printing applications. Examples include photo ID cards, driver's licenses, insurance cards, hotel key cards, membership cards, gift cards, and loyalty cards.

Composite Cards

NewBold composite cards are manufactured with a proprietary blend of PVC and PET, which produces an industry leading long-life card. These cards provide a far greater number of flexes than PVC without fracturing, splitting, or breaking. We produce several types, including 5, 8, and 10 year extended life cards.

21 Colors of PVC
